

Fiche à remplir pour participer au Parcours de l'innovation

Objective of the Road To The Innovation

You participate to the trade fair Euroforest 2018. The organization suggests you to showcase one or two innovations.

For the 7th edition, the team Euroforest and partners had imagined a novelty: a “Road To The Innovation” which will take place on the fair.

Euroforest will valorize the exhibitors:

- advertising the innovation below your stand panel with the logo “ForestINNOV”,
- creating and communicating about this road to the innovation which identifies exhibitors whose document has been validated.

The objective is to show and explain the diversification of the innovations introduced on the stands to justify a modern and innovative sector with the evolutions of the work, processes or materials used in forest. The innovations introduced must be recent and must date at the maximum from June 2014 (last Euroforest edition).

You participate to the trade fair Euroforest 2018 and you want to showcase one or two innovations,
thank you to complete the two-side document enclosed.
(1 document = 1 innovation; 2 documents max by exhibitor)
